

Lennox

Lennox Eyewear is a collection of trendy 4Care brand glasses, finished in German master workshops. Launched in 2012, the label brings out a new range of eyeglasses, sunglasses, sports glasses and special glasses every year. Each pair of individually prescribed glasses is glazed and checked in selected outlets throughout Germany by qualified opticians. All prescription glasses in the Lennox Eyewear range are fitted with extra hard, super anti-reflective, thin plastic lenses with UV protection. Lennox Eyewear glasses are available in our online store and from specialist optical retailers.

A wide variety of additional options are available for customizing both prescription glasses and sunglasses, e.g. from dirt- and water-repellent clean coat lenses through tinted, photochromic (self-tinting) or polarized lenses to extra thin lenses. And, of course, many of the glasses on offer are also available with progressive lenses.
